

Plant Genetics					
Identification number	Workload	Credit points	Term of studying	Frequency of occurrence	Duration
MN-B-SM (P 1)	360 h	12 CP	1 <sup>st</sup> or 2 <sup>nd</sup> term of studying	Summer term, 1 <sup>st</sup> half	7 weeks
<b>1</b>	<b>Type of lessons</b>		<b>Contact times</b>	<b>Self-study times</b>	<b>Intended group size</b>
	a) Lectures		20 h	30 h	max. 12
	b) Tutorials		14 h	14 h	max. 12
	c) Practical/Lab		144 h	109 h	max. 6
	d) Seminar		5 h	24 h	max. 4
<b>2</b>	<b>Aims of the module and acquired skills</b> Students who successfully completed this module ... <ul style="list-style-type: none"> <li>• have gained in-depth knowledge in up-to-date plant research topics. As this module also includes a section on molecular plant breeding which is co-taught by a plant breeder from a commercial breeding company, students will also gain transferable knowledge.</li> <li>• are trained in modern techniques in advanced molecular biology, biochemistry and cell biology (see contents of the module).</li> <li>• can independently carry out small scientific projects related to the topic of the module.</li> <li>• have learned how to present research results in oral and written form and to critically discuss scientific publications related to the topic of the module on a professional level.</li> <li>• are able to transfer skills acquired in this module to other fields of biology.</li> </ul>				
<b>3</b>	<b>Contents of the module</b> <ul style="list-style-type: none"> <li>• Theory of modern methods in molecular plant sciences (also used in other sciences)</li> <li>• Molecular breeding of crop plants in Germany</li> <li>• Plant developmental biology</li> <li>• Molecular biology of plant-environment interactions (e.g. flowering time regulation by day length and temperature)</li> <li>• Biotic interactions (e.g. symbiosis with mycorrhizal fungi)</li> <li>• Protein-protein interactions (e.g. co-immunoprecipitations, FRET, co-localization)</li> <li>• Genetic and molecular analysis of cell-cell communication (mutant analysis, plant transformation)</li> <li>• Cell imaging using fluorescent and confocal microscopy</li> <li>• Analysis of reporter gene activities, particle bombardment</li> <li>• Real-time RT-PCR to analyze gene expression</li> <li>• Adaptation and introduction into quantitative genetics</li> <li>• Other methods in modern molecular biology, biochemistry and cell biology</li> </ul>				
<b>4</b>	<b>Teaching/Learning methods</b> <ul style="list-style-type: none"> <li>• Lectures; Interactive tutorials; Practical/Lab; Seminar; Guidance to independent research; Training on presentation techniques in oral and written form</li> </ul>				

5	<p><b>Requirements for participation</b></p> <p>Enrollment in the Master´s degree course "Biological Sciences"</p> <p><b>Additionally recommended:</b> Previous participation in a <u>basic-level</u> Bachelor course on plant science (normally taught during the first two years of Bachelor studies). You should know basic plant anatomy, plant hormones such as auxin and Mendelian genetics. Students with a more specialized BSc degree in Biotechnology sometimes lack this knowledge. In cases of doubt, please contact the module coordinator (see 10) before choosing this subject module.</p>
6	<p><b>Type of module examinations</b></p> <p>The final examination consists of three parts: Two hours written examination about topics of the lectures and the practical/lab part (50 % of the total module mark), oral presentation (25 % of the total module mark) and seminar paper in form of a grant proposal outline (25 % of the total module mark)</p>
7	<p><b>Requisites for the allocation of credits</b></p> <p>Regular and active participation; Each examination part at least "sufficient" (see appendix of the examination regulations for details)</p>
8	<p><b>Compatibility with other Curricula</b></p> <p>None</p>
9	<p><b>Significance of the module mark for the overall grade</b></p> <p>15 % of the overall grade (see also appendix of the examination regulations)</p>
10	<p><b>Module coordinator</b></p> <p>Prof. Dr. Ute Höcker, phone 470-6897, e-mail: hoeckeru@uni-koeln.de</p>
11	<p><b>Additional information</b></p> <p><b>Subject module</b> of the Master´s degree course "Biological Sciences", <b>Specialization:</b> (P) Molecular Plant and Microbial Sciences</p> <p><b>Participating faculty:</b> Prof. Dr. M. Albani, Prof. Dr. M. Bucher, Prof. Dr. U. Höcker, Prof. Dr. M. Hülkamp, Prof. Dr. J. de Meaux, Dr. G. Strittmatter</p> <p><b>Literature:</b></p> <ul style="list-style-type: none"> <li>• Information about textbooks and other reading material will be given on the ILIAS representation of the course (<a href="https://www.ilias.uni-koeln.de/ilias/goto_uk_cat_2815610.html">https://www.ilias.uni-koeln.de/ilias/goto_uk_cat_2815610.html</a>)</li> </ul> <p><b>General time schedule:</b> Week 1-5 (Mon.- Fri.): Lectures, tutorials, practical/lab and writing seminar paper in form of a grant proposal; Week 6 (Mon.-Fri): Preparation for the seminar talk (held at the end of week 6); Week 7 (Mon.-Fri): Preparation for the written examination</p> <p><b>Note:</b> The module contains hands-on laboratory work conducted in groups of max. two people and is taught in a course room fully equipped with up to date research technology. The module does contain computer-based practicals/research as one main component.</p> <p><b>Introduction to the module:</b> April 12, 2021 at 8:45 a.m., Cologne Biocenter, room 4.004 (fourth floor) or online (in this case, further information/link will be sent to your Smail-Account); for preparation to the module before this introduction see ILIAS link under literature.</p> <p><b>Written examination:</b> May 31, 2021, second/supplementary examination August 06, 2021; the latter date may vary if students and module coordinator agree. More details will be given at the beginning of the module.</p>

**Corona note!** Depending on the Corona situation during the summer term, practical work may be skipped either totally or in part. In this case, some or all practical parts will be replaced by adequate alternatives so that (i) the workload and (ii) the principle content of the modules remained unchanged.
